Popular Articles
Popular article statistics page displays a list of popular articles arranged in descending order according to the number of times they have been viewed. Expand "**Statistics**" section in left navigation bar and click on "**Articles**" link. Article statistics page will display; click on "**Popular Articles**" tab to view reports related to popular articles. In **ML editions**, the report displays the articles of the particular language only i.e. language selected in language drop-down. To view the popular articles in other languages, choose the respective language from the language drop-down available on the right-hand side of the screen.

This page is divided into two parts:

1. The right side of the page shows a bar graph representation of popular articles as shown below:

   - The x-axis represents the auto generated serial ID of the article in the knowledge base.
   - Y-axis represents the total count of views corresponding to the serial ID.

2. The left side of the page shows a tabular representation of popular articles as shown in the screenshot below:

ID	Title	# Views
347	Citi Equipment DE-Install Process	18
354	Test 1 08/04/2016	4
346	Samsung Phone - Tablet Repair Process	2
10	AWS Linux Putty Authentication	1
9	MarkLogic EBS Volumes	1
21	EC2 Instances	1

(Date range: 2016-08-04 to 2016-08-06 — Go)

   - **ID:** This column displays the serial ID of the article in the knowledge base.
   - **Title:** This column displays the title of the article. You can click on the article title to view its details.
   - **Views:** This column displays the total count of the views corresponding to the article. The most popular article is listed on the top and the least one at the bottom.
   - You can use the **date drop-down** under different statistics screens to specify the period for which you want to
