Users can click "**Ask a Question**" link on header section of the front end to submit a question or to create a ticket.

KB Home | Advanced Search | News | Glossary | **Ask a Question** | My Favorites | My Profile | Admin Dashboard

A user needs to complete ask a question form in order to contact knowledge base admin users. Users are required to add their name, email address, question subject, content and priority as shown below:

- **Your Name:** If you are logged in to the knowledge base, this field will display your name. However, for other users, it displays an input field where a user can enter his name.
- **Your Email:** If you are logged in to knowledge base Email field will display your email. However, for other users, it displays an input field where a user can enter his email address. It is required in order to send an email to the user when admin user replies back to a user question.
- **Question Subject:** Enter the subject of the question in this field as shown in the figure above.
- **Content:** Enter contents of the question in this field as shown in the figure above. PHPKB knowledge base software provides the instant question suggestions facility to users. When a user types the content, the software checks the words and does a full-text search on the existing knowledge base articles. If some matching articles are, the user will get some recommendations in **Suggested Articles** box above the form as shown in the figure below.

Suggested Articles

We have found some articles that match your question. You may want to review them before submitting your question.

1. Can I bring my data from another knowledge base system to PHPKB?
2. How to motivate people to contribute to a Knowledge Sharing System?
3. Is there a maximum number of articles or categories that I can create?
4. How does your license system work?

- **Priority:** User should set a priority level (Importance of question) from a drop-down list in this field. These priorities are: low, medium, high and urgent. Priority is set so that admin user can identify a level of importance of the question.
- Click "**Submit**" button to submit the question or you can click "**Cancel**" button to abandon the submission process.
