PROBLEM: When I upload an image or video file I get "The File Type is not allowed" error (see image below):

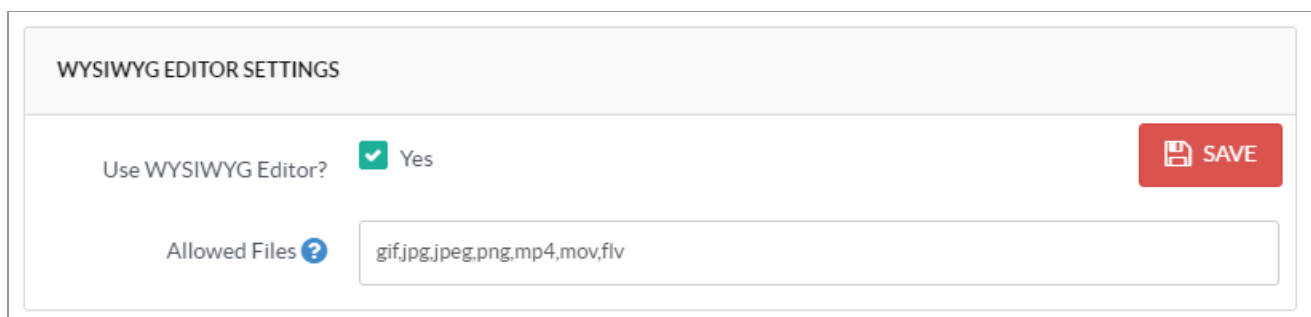

Can you help me to solve the problem?

SOLUTION: The files that are uploaded via **Asset Manager** of **WYSIWYG Editor** are controlled through:

Manage Settings » **Miscellaneous** tab » **WYSIWYG Editor Settings** section » **Allowed Files**

Just put in the desired extension separated by a comma and click **Save** or **Save Changes** button. For example: gif,jpg,jpeg,png,mp4,mov,flv

As we can see clearly, we have allowed **.gif, .jpg, .jpeg, .png, .mp4, .mov** & **.flv** (don't put a **dot** (.), instead, use a **comma** (,) in the allowed files list to separate files) images/video files format.

That's it!
