Featured articles not showing up as Featured

📄 238   👤 Palwinder Singh   📅 June 27, 2020   📁 Documentation   👁 3144   💬 0

Problem

We have 12 articles marked as Featured. But when I go to our home page and click to see Featured articles, I only see 5.

Solution

You may need to adjust a setting to display the desired number of articles on the Home page. Here are the steps:

1. Go to **Manage Settings** > **Features** tab > **Home Page Settings** section and check under **Display Featured Articles?** option & adjust its Number of Articles accordingly.
2. Save your settings. Now switch to front-end and reload your **Home** page and see if the desired articles are being displayed as expected.

That's it!
