There is a facility to bulk load (import) users in your knowledge base powered by PHPKB Software. You can bulk import users into PHPKB through the **CSV Import** section that can be accessed via:

Admin Dashboard > Tools > Import Data > CSV Import tab and select **Import Type** to be **Users** as shown in the screenshot below.

The screenshot displays the 'CSV Import' interface in the PHPKB software. At the top, there are two tabs: 'CSV Import' (active) and 'HTML Import'. The 'Import Options' section contains three main elements: a dropdown menu for 'Import Type' with 'Users' selected, a dropdown menu for 'Delimiter' with 'Comma , ' selected, and a checked checkbox labeled 'First Line Contains Field Names'. Below this is 'Step 1 (Specify CSV Source File)', which features a 'Choose File' button and the text 'No file chosen'. At the bottom of the form, there are two buttons: 'Next' (highlighted in blue) and 'Cancel'.

Then follow the onscreen instructions to load/import users.
