

# Switch from Confluence to PHPKB easily with our import tool

Ajay Chadha

3.91K 0

Our Confluence import tool can move all your work (even thousands of pages) from Confluence into PHPKB with just a few clicks. It arrives in PHPKB perfectly formatted so you can start fresh — and realize the benefits of our modern knowledge management tool that goes far beyond a wiki.

If you've been dreaming of Confluence alternatives, you have come to the right place.

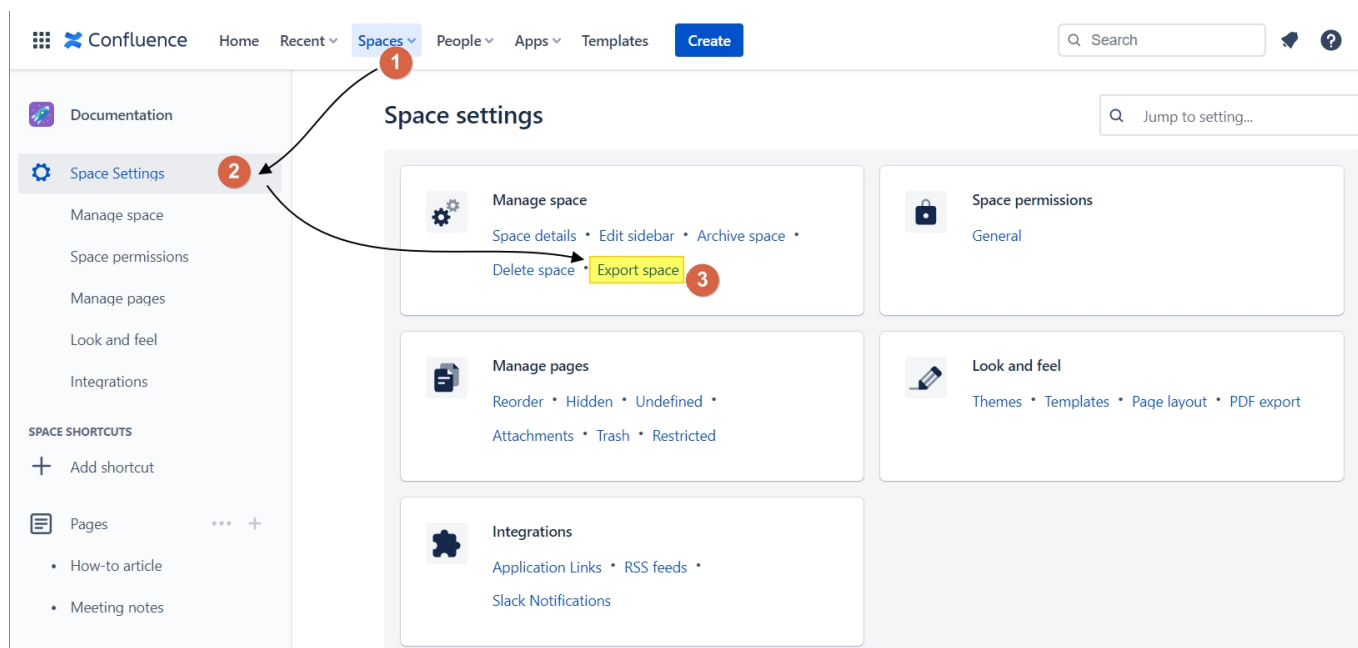

## How to use our Confluence import tool?

Move your entire workspace over to PHPKB without missing anything. In just a few clicks, you will your content in a more powerful knowledge management system.

## Export your Confluence wiki

In order to move your workspace over to PHPKB, you'll first need to get it out of Confluence. Here's how:

1. In your Confluence workspace, go to **Space Settings** on the left sidebar.
2. Under the **Manage space** section, click on the **Export space** link as shown below.

3. On the next screen, choose **HTML** from the export format options as shown below and click **Next**.

## 1Forbidden

You don't have permission to access this resource.

Additionally, a 403 Forbidden error was encountered while trying to use an ErrorDocument to handle the request.

The screenshot shows the Confluence interface. The top navigation bar includes 'Confluence', 'Home', 'Recent', 'Spaces', 'People', 'Apps', 'Templates', and a 'Create' button. The left sidebar contains 'Documentation', 'Space Settings', 'Manage space' (highlighted), 'Space permissions', 'Manage pages', 'Look and feel', 'Integrations', 'SPACE SHORTCUTS', 'Add shortcut', and 'Pages' (with sub-items: 'How-to article', 'Meeting notes'). The main content area is titled 'Manage space' and includes a breadcrumb 'Space settings'. Below the title are links for 'Space details', 'Edit sidebar', 'Archive space', 'Delete space', and 'Export space'. The 'Export Formats' section is active, showing the instruction 'Export content within this space in several formats.' and three radio button options: 'HTML' (selected), 'XML', and 'PDF'. Each option has a brief description. A 'Next >>' button is located at the bottom of the options.

4. You'll then be presented with export HTML options as shown below. Choose **Normal Export** OR **Custom Export** as required by you.

This screenshot is similar to the previous one, showing the 'Manage space' page. The 'Export space' link is active, leading to the 'Export HTML Options' section. The instruction is 'Export content within this space as HTML.' There are two radio button options: 'Normal Export' (selected) and 'Custom Export'. Each option has a description of what it generates. An 'Export' button is positioned at the bottom of the options.

5. If you select Custom Export, then select which pages you want to export from Confluence and import to PHPKB. Keep

## 23 Forbidden

Additionally, a 403 Forbidden error was encountered while trying to use an ErrorDocument to handle the request.

in mind that pages with large attachments can increase export size and complexity!

6. Allow your export to finish processing. This could take some time.
7. After the export is complete, click [Download here](#) to save the export to your computer. You'll get a zip file that contains the HTML version of the pages you selected.

If you don't see these options in your Confluence account, you might need to request permission to export from your workspace admin.

## Import your workspace into PHPKB

It takes only a few clicks to get your entire Confluence workspace into PHPKB.

1. Request the download of the Confluence import tool from your customer area.
2. On the import tool, browse the zip file containing your exported Confluence workspace and select it to be uploaded.  
Don't worry about unzipping the file! Just upload the entire archive. Give it a few minutes for the upload to complete.

**That's it!** Your Confluence data is safely imported to PHPKB knowledge base software.
