Can I bring my data from another knowledge base system to PHPKB?

👤 Ajay Chadha 👁 13.34K 💬 3

Of course, depending on the knowledge base system you are upgrading from. We created a utility called "**Data Import Module**" that automates the process of importing your data from another **Knowledge Base Software** to PHPKB.

We already have a number of data import modules available for different knowledge base systems; you can find the list below.

- Interspire ActiveKB
- Interspire Knowledge Manager
- KB Publisher
- Knowledgebase Manager Pro
- HelpJuice
- ProProfs Knowledge Base
- Freshdesk
- Zendesk
- WordPress

If we do not have one for your current knowledge base software, please contact us and we will probably be able to help.
