

How do we pay using a MasterCard for the order?

 Ajay Chadha

Problem: We tried purchasing this PHPKB knowledge base software with a credit card, but unfortunately the only credit cards we have are MasterCard, and our purchasing department told me that you do not accept MasterCard. Would you accept a check? I'm not certain how to resolve this issue.

Solution: You are right that our payment processing partner 2CheckOut.com is experiencing issues with processing MasterCard credit cards and they have temporarily stopped accepting orders using MasterCard credit cards, however they also accept PayPal which in turn accepts MasterCard Payments. So, please select the PayPal option at the Payment Method screen as shown in the image below.

 **Note:** If you do not see the PayPal option, please change the currency to dollars. It will appear when you change currency.

The screenshot shows a 'Secure Checkout' page with three steps: 'Review Cart' (checked), 'Billing Information' (checked), and 'Payment Method' (active). Under 'Payment Method', there are two options: 'Credit/Debit Card' and 'PayPal'. The 'PayPal' option is highlighted with a red rectangular box. To the right of these options is a 'SECURE PAYMENT' badge with a lock icon. Below the options, a message states: 'You will be redirected to PayPal's website to make your payment. After completing your payment, you will be forwarded back to our website to view or print your receipt.' At the bottom right, there is an orange button labeled 'Continue to PayPal'. At the bottom left, there is a disclaimer: 'By completing my purchase, I agree to the Payment Terms, Terms of Use, and the Privacy Statement. Payment support available in English.'

You will be redirected to PayPal's website to make your payment using MasterCard as shown in the image below. After completing your payment, you will be forwarded back to 2CheckOut.com to view or print your payment receipt.
